

I Am Wise

for ages up to 13

Introduction

Oddly enough, animals are the wisest beings of all. It would be a good thing for the world if people would study the animals and take on their fabulous attributes.

Each species was sent to the world to teach us something. This book is dedicated to all the animals of our planet, in gratitude for their incredible wisdoms. Time to spread our wings, stomp our feet, howl like crazy, roar like mad and become the wise being that we are meant to be.

It is unfortunate that animals can be misunderstood
So often, people do not treat them as they should.
They are here to make the world a better place
Living their best, setting a new emotional pace.
They have good wisdoms that most don't see
So it is time to learn about them, don't you agree?
They love when someone knows them for who they are
Because they love sharing their gifts to all near and far.
Join with them and become someone new
Loving, kind, caring, faithful and true.

Bear

Bear wisdoms are strength and protection

It is not that they are the strongest of animals but they know how to show their strength. They are also very strong when it comes to protecting their young and their families.
